Seven stunning stories of speculative fiction by the author of A Boy and His Dog. In a post-apocalyptic world, four men and one woman are all that remain of the human race, brought to near extinction by an artificial intelligence. Programmed to wage war on behalf of its creators, the AI became self-aware and turned against humanity. The five survivors are prisoners, kept alive and subjected to brutal torture by the hateful and sadistic machine in an endless cycle of violence. This story and six more groundbreaking and inventive tales that probe the depths of mortal experience prove why Grand Master of Science Fiction Harlan Ellison has earned the many accolades to his credit and remains one of the most original voices in American literature. I Have No Mouth and I Must Scream also includes "Big Sam Was My Friend," "Eyes of Dust," "World of the Myth," "Lonelyache," Hugo Award finalist "Delusion for a Dragon Slayer," and Hugo and Nebula Award finalist "Pretty Maggie Moneyeyes." Best of TOC is a collection of essential posts from the last 12 months, selected from the TOC blog and a number of external sources. One of the mantras at Tools of Change is "fail forward fast," which is an alliterative way of encouraging experimentation. That's why we felt it appropriate to use Best of TOC as a testing ground for a "Web-to-book" process. As we hoped, experimentation led to lessons we wouldn't have learned otherwise. The material in Best of TOC is a small part of an ongoing dialog. We hope you'll join us on the TOC blog and the TOC Community as we collaboratively discuss the tools, developments, and organizations that are shaping the future of publishing.

Internet piracy goes by many names — copyright infringement, file sharing, peer-to-peer lending — but in this lively narrative nonfiction account, author Chris Ruen argues that the practice of using unlicensed digital content should be called what it is: freeloading. In this comprehensive investigation, Ruen examines the near pervasive problem of internet piracy, and the moral and monetary dilemmas to which it gives rise. The phenomenon, which today affects almost everyone who taps a keyboard, is creating unlikely alliances — between artists and corporations, and between consumers and technology geeks in the hacker tradition — and it is changing how society views and values artistic production. Ruen, himself a former freeloader, came to understand how illegal downloads can threaten the artistic community after he spent time with successful Brooklyn bands who had yet to make a real profit from their music. Through original research and extensive interviews with musicians and artists, Freeloading dissects this battle. This provocative account is also a reminder of the truism that for every action there are consequences — a call to embrace practical, sensible solutions that protect artists and consumers alike. Unlike traditional music, film music sources are often difficult to locate and do not follow the patterns that researchers are trained to identify. Although there have been several self-described introductions to the field and articles that summarize the problems and state of research, there is no resource that gathers together all of the basic information that is vital to film

music research. In this volume, Jeannie Gayle Pool and H. Stephen Wright address the difficulties scholars encounter when conducting research on film and television music. Intended as a guide for scholars and researchers in navigating the complex world of film and television music, this book provides a detailed taxonomy of film music primary sources and explains how to find and interpret them. The authors tackle the problems of determining film score authorship and working with recordings of film music. A bibliographic essay summarizes the major works and trends in film music research and provides clear pointers to the most important resources in the field. An up-to-date guide to important collections of film music sources and other research materials is also included. Designed to clarify the nature of film music source materials and how they are generated, *A Research Guide to Film and Television Music in the United States* provides clear signposts for scholars and identifies opportunities for further research.

If you love small-unit actions, this is the book for you.

Follow Meyer with the 1st SS-Panzer Division "Leibstandarte" and the 12th SS-Panzer Division "Hitlerjugend," from the first day of the war in Poland, through service in France, Russia, and Greece, up until his capture in Normandy in 1944 and his postwar trials and tribulations. The body of a young man is found splayed out in the middle of one of the most august public squares in England. Soon it is discovered that the dead man was at the center of a beguiling web of entanglements and intrigue. Will the intrepid detectives get to the bottom of things and puncture the thick veil of corruption that seems to surround the case? This book traces practices of militarization and resistance that have emerged under the sign of motherhood in US Foreign Policy. *Gender, Agency and War* examines this discourse against the background of three key moments of American foreign policy formation: the anti-nuclear movement of the 1980s, the Gulf War of the early 1990s, and the recent invasion of Iraq. For each of these moments the author explores the emergence of a historically specific and emblematic maternalized mode of female embodiment (ranging from the 'hysterical' antinuclear protester to the figure of 'Supermom'), in order to shed light onto the various practices which define and enable expressions of American sovereignty. In so doing, the text argues that the emergence of particular raced, gendered, and maternalized bodies ought not to be read as merely tangential to affairs of state, but as instantiations of global politics. This work urges an approach that rereads the body as an 'event' – with significant implications for the ways in which international politics and gender are currently understood. This book will be of much interest to students of gender politics, critical security studies, US foreign policy and IR in general.
