So Much for That Oct 06 2020 An extraordinary novel from the Orange Prize winning author of 'We Need to Talk About Kevin'.

Five Days at Memorial Dec 28 2019 In the tradition of the best writing on human behaviour and moral choices in the face of disaster, physician and reporter Sheri Fink reconstructs five days at New Orleans' Memorial Medical Center during Hurricane Katrina and draws the reader into the lives of those who struggled mightily to survive and to maintain life amidst chaos. After Katrina struck and the floodwaters rose, the power failed, and the heat climbed, exhausted caregivers chose to designate certain patients last for rescue. Months later, several health professionals faced criminal allegations that they deliberately injected numerous patients with drugs to hasten their deaths. *Five Days at Memorial*, the culmination of six years of reporting, unspools the mystery of what happened in those days, bringing the reader into a hospital fighting for its life and into a conversation about the most terrifying form of health care rationing. In a voice at once involving and fair, masterful and intimate, Fink exposes the hidden dilemmas of end-of-life care and reveals just how ill-prepared we are for the impact of large-scale disasters - and how we can do better. A remarkable book, engrossing from start to finish, *Five Days at Memorial* radically transforms our understanding of human nature in crisis.

The Beginning of My Immortal Life and Eternity May 01 2020 This book gives the basic knowledge to anyone who is going to start immortal living. Author describes his own experience in living immortally, shares his feelings, and everyday practice that help him and entire family in very difficult time in they life. Immortality is a pleasure and the remedy for cure the most difficult troubles in humans

The Skeleton Cupboard Sep 28 2022 *The Skeleton Cupboard* is Professor Tanya Byron's account of

her years of training as a clinical psychologist, when trainees find themselves in the toughest placements of their careers. Through the eyes of her naive and inexperienced younger self, Tanya shares remarkable stories inspired by the people she had the privilege to treat. Gripping, poignant and full of daring black humour, this book reveals the frightening and challenging induction faced by all mental health staff and highlights their incredible commitment to their patients. Powerfully moving and beautifully written, *The Skeleton Cupboard* shares the tales of ordinary people with an amazing resilience to the challenges of life.

Daughter of the Moon Goddess (The Celestial Kingdom Duology, Book 1) Jan 09 2021 The bestselling debut fantasy inspired by the legend of the Chinese moon goddess. A young woman's quest to free her mother pits her against the most powerful immortal in the realm, setting her on a dangerous path where those she loves are not the only ones at risk... *THE INSTANT TOP 5 SUNDAY TIMES BESTSELLER*

The Immortal Life of Henrietta Lacks Aug 04 2020 THE IMMORTAL LIFE OF HENRIETTA LACKS, NOW AN HBO FILM STARRING OPRAH WINFREY & ROSE BYRNE "No dead woman has done more for the living . . . A fascinating, harrowing, necessary book" Hilary Mantel, *The Guardian* Her name was Henrietta Lacks, but scientists know her as HeLa. Born a poor black tobacco farmer, her cancer cells - taken without her knowledge - became a multimillion-dollar industry and one of the most important tools in medicine. Yet Henrietta's family did not learn of her 'immortality' until more than twenty years after her death, with devastating consequences . . . Rebecca Skloot's fascinating account is the story of the life, and afterlife, of one woman who changed the medical world forever. Balancing the beauty and drama of scientific discovery with dark questions about who owns the stuff our bodies are made of, *The Immortal Life of Henrietta Lacks* is an extraordinary journey in search of the soul and story of a real woman, whose cells live on today in all four corners of the world. "An extraordinary mix of memoir and science reveals the story of how one woman's cells have saved countless lives" *Daily Telegraph* "A heartbreaking account of racism and injustice . . . Moving and magnificent" *Metro*

Swimming Across Nov 26 2019 Elegant and concise, this childhood memoir of Andy Grove, one of the pioneers of Silicon Valley, begins in Budapest, Hungary where the author was born into a secular Jewish family in 1936. As a small child, Andris Grof was told, "Jesus Christ was killed by the Jews, and because of that, all of the Jews will be thrown into the Danube." Grof's school years were marked by such anti-semitism and interrupted first by the Nazi occupation and then by the post-war Communist regime. He was a good student who excelled at chemistry which he was studying at the University of Budapest when the Hungarian uprising of 1956 persuaded him to "swim across" the border and emigrate to the West. Grove provides an interesting sketch of a boy's coming of age in a deeply dangerous 20th century Budapest under the control of Nazis and then Communists and concludes the memoir with an account of his escape and eventual resumption of his studies at the City College of New York. "Haunting and inspirational. It should be required reading in schools." — Tom Brokaw "A poignant memoir... a moving reminder of the meaning of America and the grit and courage of a remarkable young man who became one of America's phenomenal success stories." — Henry Kissinger "This honest and riveting account gives a fascinating insight into the man who wrote *Only the Paranoid Survive*." — George Soros "Andy Grove is a tremendous role model, and his book sheds light on his amazing journey. I would choose him as my doubles partner any day!" — Monica Seles "Combines a unique and often harrowing personal experience with the virtues of fiction at its most engrossing — vivid scenes, sharply delineated characters, and an utterly compelling narrative... a wonderful reading experience." — Richard North Patterson "A poignant tale leading to human courage and hope." — Elie Wiesel "Grove, the founder and chairman of Intel Corporation, does not whine about his hardships. Instead he recalls ordinary events and matter-of-factly juxtaposes these against the turmoil of midcentury Hungary, creating a subtle though compelling commentary on the power to endure." — Diane Scharper, *The New York Times* "Swimming Across tells the childhood stories [Grove] has guarded since first entering the public eye four decades ago... [It] is driven not by executives battling for money and power, but the experiences

— some mundane, some extraordinary — of a nonobservant Jewish boy growing up in Hungary through a fascist regime, a Nazi invasion and a Soviet occupation.” — Chris Gaither, *The New York Times* “The intelligence, dedication and ingenuity that earned him fame and fortune (he was *Time*’s Man of the Year in 1997) are evident early on... Grove’s story stands smartly amid inspirational literature by self-made Americans” — *Publishers Weekly* “A tight, simply told, extremely intimate memoir... a polished, solid portrait of a particular time and place.” — *Kirkus* “[A] moving and inspiring memoir... Grove’s account of life in Hungary in the 1950s is a vivid picture of a tumultuous period in world history.” — *Booklist*

Life at the Extremes Jul 03 2020 From the oxygen-deprived heights of Everest to the high-pressure ocean depths, the limits of human endurance are probed in this fascinating look at the borderlands of physical potential.

Grace Williams Says It Loud Jul 15 2021 This isn't an ordinary love story. But then Grace isn't an ordinary girl. 'Disgusting,' said the nurse. And when no more could be done, they put her away, aged eleven. On her first day at the Briar Mental Institute, Grace meets Daniel. He sees a different Grace: someone to share secrets and canoodle with, someone to fight for. Debonair Daniel, who can type with his feet, fills Grace's head with tales from Paris and the world beyond. This is Grace's story: her life, its betrayals and triumphs, disappointment and loss, the taste of freedom; roses, music and tiny scraps of paper. Most of all, it is about the love of a lifetime.

The Immortal Life of Henrietta Lacks Jan 01 2023 Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor black tobacco farmer who worked the same land as her slave ancestors yet her cells - taken without her knowledge - become one of the most important tools in modern medicine.

Otherlands Feb 28 2020 FOYLES NON-FICTION BOOK OF THE YEAR A SUNDAY TIMES TOP TEN BESTSELLER THE WAINWRIGHT PRIZE FOR NATURE WRITING - HIGHLY COMMENDED LONGLISTED FOR THE BAILLIE GIFFORD PRIZE FOR NON-FICTION 'The best book on the history of life on Earth I have ever read' Tom Holland 'Epically cinematic... A book of almost unimaginable riches' *Sunday Times* This is the past as we've never seen it before. *Otherlands* is an epic, exhilarating journey into deep time, showing us the Earth as it used to exist, and the worlds that were here before ours. Travelling back in time to the dawn of complex life, and across all seven continents, award-winning young palaeobiologist Thomas Halliday gives us a mesmerizing up close encounter with eras that are normally unimaginably distant. Halliday immerses us in a series of ancient landscapes, from the mammoth steppe in Ice Age Alaska to the lush rainforests of Eocene Antarctica, with its colonies of giant penguins, to Ediacaran Australia, where the moon is far brighter than ours today. We visit the birthplace of humanity; we hear the crashing of the highest waterfall the Earth has ever known; and we watch as life emerges again after the asteroid hits, and the age of the mammal dawns. These lost worlds seem fantastical and yet every description - whether the colour of a beetle's shell, the rhythm of pterosaurs in flight or the lingering smell of sulphur in the air - is grounded in the fossil record. *Otherlands* is a staggering imaginative feat: an emotional narrative that underscores the tenacity of life - yet also the fragility of seemingly permanent ecosystems, including our own. To read it is to see the last 500 million years not as an endless expanse of unfathomable time, but as a series of worlds, simultaneously fabulous and familiar.

Culturing Life May 13 2021 How did cells make the journey, one we take so much for granted, from their origin in living bodies to something that can be grown and manipulated on artificial media in the laboratory, a substantial biomass living outside a human body, plant, or animal? This is the question at the heart of Hannah Landecker's book. She shows how cell culture changed the way we think about such central questions of the human condition as individuality, hybridity, and even immortality and asks what it means that we can remove cells from the spatial and temporal constraints of the body and "harness them to human intention." Rather than focus on single discrete biotechnologies and their stories--embryonic stem cells, transgenic animals--Landecker documents and explores the wider genre of technique behind artificial forms of cellular life. She traces the lab

culture common to all those stories, asking where it came from and what it means to our understanding of life, technology, and the increasingly blurry boundary between them. The technical culture of cells has transformed the meaning of the term "biological," as life becomes disembodied, distributed widely in space and time. Once we have a more specific grasp on how altering biology changes what it is to be biological, Landecker argues, we may be more prepared to answer the social questions that biotechnology is raising.

Summary of Rebecca Skloot's *The Immortal Life of Henrietta Lacks* Jan 21 2022 Please note: This is a companion version & not the original book. Sample Book Insights: #1 On January 29, 1951, David Lacks sat behind the wheel of his old Buick, watching the rain fall. He was parked under a towering oak tree outside Johns Hopkins Hospital with three of his children—two still in diapers—waiting for their mother, Henrietta. She had been telling her closest friends something was wrong with her sex life, but she still said no when she was pregnant with Joe, her fifth child. #2 Henrietta was diagnosed with a tumor on her cervix, but when she went to the hospital, she was treated for syphilis. She had six children with her husband, and she was never able to travel. She was asymptomatic neuro syphilitic, and her husband had no liking for sexual intercourse. #3 Henrietta was a prime example of how little black patients knew about their health. She had never heard of cervical cancer, and when she went to the hospital, she was sent home with a diagnosis of no abnormality of the cervix. Three months later, she had a full-blown tumor. #4 Henrietta Lacks was a woman whose cells were taken and sold by the thousands without her consent. She was born in 1920 in Virginia, and her cells were taken and sold by the thousands without her consent.

The Immortal Life of Henrietta Lacks Sep 16 2021 How to Use This Book This book is to be used alongside the bestselling book, *The Immortal Life of Henrietta Lacks* by Rebecca Skloot for anyone interested in learning about one of the most important tools in medicine, vital for developing the polio vaccine, cloning, gene mapping, and more, the HeLa cells. This is also the story of the collision between ethics, race, and medicine; of scientific discovery and faith healing; and a daughter consumed with questions about the mother she never knew. For students: The study questions are in order and follow Rebecca Skloot's narrative. Answer questions as you read the book. Answers follow each question. For teachers: This is an easy and interesting resource to help your students learn about a specific tool used in medicine, the HeLa cell and how it originated and the impact its discovery had on medicine and the population. Use your own unique teaching style to supplement the Pembroke Notes with engaging activities and links for further investigating. With the new Common Core standards and a push to increased rigor, I have added a Writing Workshop section at the end of my book to help you with writing assignments. For homeschoools: Your high school student will love the easy guide to help him/her in her reading *The Immortal Life of Henrietta Lacks*. Parents, be prepared for active discussions with your teenager while you read along. A Writing Workshop is supplied at the end of the book as a guide."

Immortal Life Jun 25 2022 "The story of an artificial human being named Gene who discovers he's been created to provide a fresh new body for the consciousness of an aging business titan. Determined to maintain his autonomy, Gene rebels"--

Summary of *The Immortal Life of Henrietta Lacks* Jul 27 2022 Summary of *The Immortal Life of Henrietta Lacks* Rebecca Skloot, a specialist in science and medicine, authored *The Immortal Life of Henrietta Lacks*, which has become one of her best-selling books. The book was published in 2010 and it remained on The New York Best seller list for a long time. This book is about the subjects of science and medicine, focusing on the story of a young woman who is struggling hard against cervical cancer. The story shows how this young patient and all around her are affected by the disease, and the benefits to scientific research that result from her disease. The book also brings into focus the social class and racism perspective which made the book a best seller. The author writes in the book that she got most of the information by studying the journal of the young woman's daughter. Because this did not provide enough information to produce the book, she did more research on other content so she could find enough detail to present the whole story. In addition, Oprah Winfrey came up with the idea to turn the story into a Home Box Office movie. Overall, the

book is an interesting read, which revolves around social and race issues, highlighting the plight of African-American people who have suffered considerably in the United States. Here is a Preview of What You Will Get: □ A Full Book Summary □ An Analysis □ Fun quizzes □ Quiz Answers □ Etc. Get a copy of this summary and learn about the book.

The Immortal Life of Henrietta Lacks Nov 30 2022 For use in schools and libraries only.

Documents the story of how scientists took cells from an unsuspecting descendant of freed slaves and created a human cell line that has been kept alive indefinitely, enabling numerous medical and scientific discoveries.

It also includes detailed analysis of these important characters: Deborah Lacks; Henrietta Lacks; Rebecca Skloot; George Gey.

Teach Us to Sit Still Apr 11 2021 "Teach Us to Sit Still is the visceral, thought-provoking, and inexplicably entertaining story of how Tim Parks found himself in serious pain, how doctors failed to help, and the quest he took to find his own way out. Overwhelmed by a crippling condition which nobody could explain or relieve, Parks follows a fruitless journey through the conventional medical system only to find relief in the most unexpected place: a breathing exercise that eventually leads him to take up meditation. This was the very last place Parks anticipated finding answers; he was about as far from New Age as you can get. As everything that he once held true is called into question, Parks confronts the relationship between his mind and body, the hectic modern world that seems to demand all our focus, and his chosen life as an intellectual and writer. He is drawn to consider the effects of illness on the work of other writers, the role of religion in shaping our sense of self, and the influence of sports and art on our attitudes toward health and well-being. Most of us will fall ill at some point; few will describe that journey with the same verve, insight, and radiant intelligence as Tim Parks"--Provided by publisher.

Tut: The Story of My Immortal Life Dec 20 2021 Tut: The Story of My Immortal Life is a funny, fast-paced novel for young readers by P.J. Hoover which chronicles the mischievous adventures of King Tut, now an immortal eighth-grader living in Washington, D.C.. You'd think it would be great being an Egyptian demigod, but if King Tut has to sit through eighth grade one more time, he'll mummify himself. Granted the gift of immortality by the gods—or is it a curse?—Tut has been stuck in middle school for ages. Even worse, evil General Horemheb, the man who killed Tut's father and whom Tut imprisoned in a tomb for three thousand years, is out and after him. The general is in league with the Cult of Set, a bunch of guys who worship one of the scariest gods of the Egyptian pantheon—Set, the god of Chaos. The General and the Cult of Set have plans for Tut... and if Tut doesn't find a way to keep out of their clutches, he'll never make it to the afterworld alive. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Mayo Clinic Nov 06 2020 A photo-filled history of the world-renowned medical center, based on the award-winning PBS documentary by Ken Burns, Erik Ewers, and Christopher Loren Ewers. On September 30, 1889, W.W. Mayo and his sons Will and Charlie performed the very first operation at a brand-new Catholic hospital in Rochester, Minnesota. It was called Saint Mary's. The hospital was born out of the devastation of a tornado that had struck the town six years earlier, after which Mother Alfred Moes of the Sisters of Saint Francis told the Mayos that she had a vision of building a hospital that would "become world renowned for its medical arts." Based on the film by acclaimed documentary filmmaker Ken Burns, *The Mayo Clinic: Faith, Hope, Science* chronicles the history of this unique organization, from its roots as an unlikely partnership between a country doctor and a

Franciscan order of nuns to its position today as a worldwide model for patient care, research, and education. Featuring more than 400 compelling archival and modern images, as well as the complete script from the film, the book demonstrates how the institution's remarkable history continues to inspire the way medicine is practiced there today. In addition, case studies reveal patients, doctors, and nurses in their most private moments as together they face difficult diagnoses and embark on uncertain treatments. The film and this companion book tell the story of an organization that has managed to stay true to its primary value: The needs of the patient come first. Together they make an important contribution to the critical discussions about the delivery of health care today in America—and the world.

Summary and Analysis of the Immortal Life of Henrietta Lacks Feb 19 2022 So much to read, so little time? Get an in-depth summary of *The Immortal Life of Henrietta Lacks*, the #1 bestseller about science, race, and medical ethics. For decades, scientists have been using "HeLa" cells in biological research, from developing the polio vaccine and studying the nature of cancer to observing how human biology behaves in outer space. This famous cell line began as a sample taken from a poor African American mother of five named Henrietta Lacks. A cancer patient, Henrietta Lacks went through medical testing but never gave consent for the use of her cells. She died of cervical cancer in 1951, without ever knowing that the samples were intended for extensive medical research. This summary of the #1 New York Times bestseller by Rebecca Skloot tells Henrietta's story and reveals what happened when her family found out that her cells were being bought and sold in labs around the world. With historical context, character profiles, a timeline of key events, and other features, this summary and analysis of *The Immortal Life of Henrietta Lacks* is intended to complement your reading experience and bring you closer to a great work of nonfiction.

There Is No Me Without You Oct 25 2019 The best-selling author of *Praying for Sheetrock* offers a revealing study of the human cost of the AIDS pandemic in Africa, in an inspirational portrait of Heregwoin Tefera, a widowed recluse in Addis Ababa, Ethiopia, who has become the caretaker of sixty children orphaned and abandoned by the AIDS crisis. Reprint.

This 38-page guide for "The Immortal Life of Henrietta Lacks" by Rebecca Skloot includes detailed chapter summaries and analysis covering 38 chapters, as well as several more in-depth sections of expert-written literary analysis. Featured content includes commentary on major characters, 10 important quotes, discussion topics, and key themes like Scientific Ethics and Informed Consent.

The Kid May 25 2022 From acclaimed journalist Ben Bradlee Jr. comes the epic biography of Boston Red Sox legend Ted Williams that baseball fans have been waiting for. Williams was the best hitter in baseball history. His batting average of .406 in 1941 has not been topped since, and no player who has hit more than 500 home runs has a higher career batting average. Those totals would have been even higher if Williams had not left baseball for nearly five years in the prime of his career to serve as a Marine pilot in WWII and Korea. He hit home runs farther than any player before him -- and traveled a long way himself, as Ben Bradlee, Jr.'s grand biography reveals. Born in 1918 in San Diego, Ted would spend most of his life disguising his Mexican heritage. During his 22 years with the Boston Red Sox, Williams electrified crowds across America -- and shocked them, too: His notorious clashes with the press and fans threatened his reputation. Yet while he was a God in the batter's box, he was profoundly human once he stepped away from the plate. His ferocity came to define his troubled domestic life. While baseball might have been straightforward for Ted Williams, life was not. *The Kid* is biography of the highest literary order, a thrilling and honest account of a legend in all his glory and human complexity. In his final at-bat, Williams hit a home run. Bradlee's marvelous book clears the fences, too.

Life, Death, and Immortality Apr 23 2022 Explains the purpose of material and spiritual existence. Begins and ends by examining the purpose of life and death, achieving happiness, and developing loving relationships.

Oxygen Dec 08 2020 Oxygen offers fresh perspectives on our own lives and deaths, explaining modern killer diseases, why we age, and what we can do about it. Advancing revelatory new ideas, following chains of evidence, the book ranges through many disciplines, from environmental sciences to molecular medicine. Damage to DNA caused by oxidative stress appears to explain aging and many of its diseases, hence the popularity in alternative health circles of antioxidants. But antioxidants alone fail to prevent aging. Lane suggests two different avenues of study: modulation of the immune system, which generates free radicals as part of its defense against infectious diseases; and ways of improving the health of our cellular mitochondria, on which many age-related ailments seem to depend. Provocative and complexly argued. Copyright ©Kirkus Reviews, used with permission.

Ageless Mar 30 2020 'A stunner ... If you haven't got this book in your house, I don't know why' Chris Evans 'A startling wake-up call . . . Writing with the vim of a Bill Bryson and the technical knowledge of a scientist, Steele gives us a chance to grasp what's at stake' Independent 'An exhilarating journey . . . Steele is a superb guide' Telegraph 'A fascinating read with almost every page bursting with extraordinary facts . . . Read it now' Mail on Sunday Ageless is a guide to the biggest issue we all face. Ageing - not cancer, not heart disease - is the world's leading cause of death and suffering. What would the world be like if we could cure it? Living disease-free until the age of 100 is achievable within our lifetimes. In prose that is lucid and full of fascinating facts, Ageless introduces us to the cutting-edge research that is paving the way for this revolution. Computational biologist Andrew Steele explains what occurs biologically as we age, as well as practical ways we can slow down the process. He reveals how understanding the scientific implications of ageing could lead to the greatest discovery in the history of civilisation - one that has the potential to improve billions of lives, save trillions of dollars, and transform the human condition.

Food, Health and Happiness Jun 13 2021 Oprah Winfrey has spent her life trying to make peace with food, which has been such a source of pleasure and meaning for her. Now Oprah has found ways to have her favorite meals while also controlling her weight, and in Food, Health and Happiness she shares not only her struggles with food but also the recipes that have allowed food to be a source of joy for her again. With help from the chefs who have cooked for her over the years such as Rosie Daley, Art Smith, Mei Lin, Taryn Huebner, and Sonny Sweetman, this is an extraordinarily personal cookbook while also being an invitation to Oprah's many fans to eat both healthfully and happily. From simple pleasures such as 'Unfried Chicken' or 'Turkey Chili' to such celebrations of freshness as 'Farro With Peas, Asparagus, Pesto and Cured Olives' and 'Chilean Sea Bass with Lemon Fennel Chutney,' this is food as it should be: a source of happiness, a ritual to be shared, a celebration of life.

Immortal Life Feb 07 2021 An ancient mogul has bought the power to live forever, but the strong young body he plans to inhabit has other ideas. The battle for immortal life begins in Stanley Bing's "stimulating, satirical and perhaps even visionary novel" (Wall Street Journal). Immortal life. A fantasy, an impossible dream—or is it? The moguls of Big Tech are pouring their mountain of wealth into finding a cure for death and they are determined to succeed. None of these titans is richer than Arthur Vogel. The inventor, tech tycoon, and all-round monster has amassed trillions of dollars and rules over a corporate empire stretching all the way to Mars. The newest—and most expensive—life extension technology has allowed him to live to 127 years, but time is running out. His last hope to escape the inevitable lies with Gene, a human specifically created for the purpose of housing Arthur's consciousness. The plan is to discard his aged body and come to a second life in a young, strong host. But there's a problem: Gene. He may be artificial, but he is a person—and he has other ideas. As Arthur sets off to achieve his goal of world domination, Gene hatches a risky plan of his own. The forces against him are rich, determined, and used to getting what they pay for. The battle between creator and creation is heightened as the two minds wrestle for control of one body. Mixing brisk action, humor, and wicked social commentary, author Stanley Bing has crafted "an engaging and cautionary tale about the direction in which spaceship Earth is hurtling" (USA Today). Welcome to a brave new world that is too familiar for comfort—and watch the struggle for humanity play out

to the bitter end.

Holy Bible Aug 23 2019 A reasonably priced, quality black hardcover pew and ministry Bible featuring a large 12-point font.

The Monkey Wars Jan 27 2020 The controversy over the use of primates in research admits of no easy answers. We have all benefited from the medical discoveries of primate research--vaccines for polio, rubella, and hepatitis B are just a few. But we have also learned more in recent years about how intelligent apes and monkeys really are: they can speak to us with sign language, they can even play video games (and are as obsessed with the games as any human teenager). And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers (in 1982, a Silver Spring lab was charged with 17 counts of animal cruelty). It is a complex issue, made more difficult by the combative stance of both researchers and animal activists. In *The Monkey Wars*, Deborah Blum gives a human face to this often caustic debate--and an all-but-human face to the subjects of the struggle, the chimpanzees and monkeys themselves. Blum criss-crosses America to show us first hand the issues and personalities involved. She offers a wide-ranging, informative look at animal rights activists, now numbering some twelve million, from the moderate Animal Welfare Institute to the highly radical Animal Liberation Front (a group destructive enough to be placed on the FBI's terrorist list). And she interviews a wide variety of researchers, many forced to conduct their work protected by barbed wire and alarm systems, men and women for whom death threats and hate mail are common. She takes us to Roger Fouts's research center in Ellensburg, Washington, where we meet five chimpanzees trained in human sign language, and we visit LEMSIP, a research facility in New York State that has no barbed wire, no alarms--and no protesters chanting outside--because its director, Jan Moor-Jankowski, listens to activists with respect and treats his animals humanely. And along the way, Blum offers us insights into the many side-issues involved: the intense battle to win over school kids fought by both sides, and the danger of transplanting animal organs into humans. "As it stands now," Blum concludes, "the research community and its activist critics are like two different nations, nations locked in a long, bitter, seemingly intractable political standoff....But if you listen hard, there really are people on both sides willing to accept and work within the complex middle. When they can be freely heard, then we will have progressed to another place, beyond this time of hostilities." In *The Monkey Wars*, Deborah Blum gives these people their voice.

The Best American Science Writing 2011 Mar 23 2022 Edited by Rebecca Skloot, award-winning science writer and New York Times bestselling author of *The Immortal Life of Henrietta Lacks*, and her father, Floyd Skloot, an award-winning poet and writer, and past contributor to the series, *The Best American Science Writing 2011* collects into one volume the most crucial, thought-provoking, and engaging science writing of the year. Culled from a wide variety of publications, these selections of outstanding journalism cover the full spectrum of scientific inquiry, providing a comprehensive overview of the most compelling, relevant, and exciting developments in the world of science. Provocative and engaging, *The Best American Science Writing 2011* reveals just how far science has brought us--and where it is headed next.

The Tidal Zone Aug 28 2022 Adam is a stay-at-home dad who is also working on a history of the bombing and rebuilding of Coventry Cathedral. He is a good man and he is happy. But one day, he receives a call from his daughter's school to inform him that, for no apparent reason, fifteen-year-old Miriam has collapsed and stopped breathing. In that moment, he is plunged into a world of waiting, agonising, not knowing. The story of his life and the lives of his family are rewritten and re-told around this shocking central event, around a body that has inexplicably failed. In this exceptionally courageous and unflinching novel of contemporary life Sarah Moss goes where most of us wouldn't dare to look, and the result is riveting - unbearably sad, but also miraculously funny and ultimately hopeful. *The Tidal Zone* explores parental love, overwhelming fear, illness and recovery. It is about clever teenagers and the challenges of marriage. It is about the NHS, academia, sex and gender in the twenty-first century, the work-life juggle, and the politics of packing lunches and loading dishwashers. It confirms Sarah Moss as a unique voice in modern fiction and a writer of luminous

intelligence.

Summary, Analysis, and Review of Rebecca Skloot's the Immortal Life of Henrietta Lacks

Oct 18 2021 PLEASE NOTE: This is a key takeaways and analysis of the book and NOT the original book. Start Publishing Notes' Summary, Analysis, and Review of Rebecca Skloot's The Immortal Life of Henrietta Lacks includes a summary of the book, review, analysis & key takeaways, and detailed "About the Author" section. PREVIEW: The Immortal Life of Henrietta Lacks is a creative non-fiction book that explores the source of HeLa, the most commonly used human cell line in the world. In order to bring its origin to light, Rebecca Skloot weaves together several narrative threads. One is primarily focused on Henrietta Lacks, the woman who, without her knowledge, became central to 20th century biomedical research. Another is the birth of modern biomedical research itself, and its roots in the American eugenics movement. Finally, there is the impact of this research, both of the Lacks Family and on society at large. Skloot divides the book into 3 parts: Life, Death, and Immortality, which intertwines a complicated cast of characters and jumps between dramatized historical anecdotes, Skloot's first-person detective work, and a layman's explanations of complicated matters of modern cell biology and medical ethics.

A History and Theory of Informed Consent Sep 04 2020 A timely, authoritative discussion of an important clinical topic, this useful book outlines the history, function, nature and requirements of informed consent, focusing on patient autonomy as central to the concept. Primarily a philosophical analysis, the book also covers legal aspects, with chapters on disclosure, comprehension, and competence.

The Immortal Aug 16 2021 Emma just turned forty and has finally begun living her best life. She books a vacation to a resort only to find herself on the dinner menu of an immortal Viking. With only her wit and a little luck, maybe Emma will make it off the island alive. Spoiler alert: Don't fall in love, or the ending will rip your heart out. Life or death, the choice is hers.

The Windrush Betrayal Sep 24 2019 A NEW STATESMAN AND SPECTATOR BOOK OF THE YEAR SHORTLISTED FOR THE ORWELL PRIZE FOR POLITICAL WRITING LONGLISTED FOR THE BAILLIE GIFFORD PRIZE A searing portrait of Britain's hostile environment by the journalist behind the Windrush exposé. 'A timely reminder of what truly great journalists can achieve.' DAVID OLUSOGA '[Gentleman's] reporting proves why an independent press is so vital.' RENI EDDO-LODGE 'A book that keeps you informed and makes you angry.' GARY YOUNGE 'It is impossible to overstate the importance of this heartbreaking book.' JAMES O'BRIEN How do you pack for a one-way journey back to a country you left when you were eleven and have not visited for fifty years? Amelia Gentleman's exposé of the Windrush scandal - where thousands of British citizens were wrongly classified as illegal immigrants with life-shattering consequences - shocked the nation and led to the resignation of Amber Rudd as Home Secretary. Here, Gentleman tells the full story for the first time. 'Essential . . . a damning indictment.' SIR LENNY HENRY 'Gentleman boldly chronicles the devastating reality of a scandal that illegalised, imbruted and abandoned British citizens.' DAVID LAMMY MP 'I'm thankful for the truth and hope [. . .] in Amelia Gentleman's The Windrush Betrayal.' ALI SMITH 'A devastating account.' CLAIRE TOMALIN

The Immortal Life of Riley Jun 01 2020 The Immortal Life of Riley tells of the journey through from childhood that may explain some of the reasons why alcoholism became a way of life for Riley. This book fills in the blanks left open in the Immortal Alcoholic's Wife. Riley's military career and previous marriages are all apart of his history. He was a good man who had a bad addiction. He was loved by as many people as he hurt. This is an account of his reality.
