A practical guide to Community Management in Dubai Dec 29 2019 Waqar has spent his whole career working in the Community Management profession. Mostly self-taught, he has established and developed his business and trained his staff directly. The inspiration for this book comes from his desire to extend the dissemination of his knowledge further afield. With the recent introduction of a brand new and bespoke Jointly Owned Property (JOP) law in Dubai, the timing of the book seems perfect. The new law sets a milestone in the development of the Real Estate market in Dubai. It was needed to address specifically the diversity of the communities which have been developed in the region and to establish a framework to regulate their operations more effectively with less red tape. Many of the Community Management professionals who have learned the previous methods of Owners Association are now faced with the daunting task of unlearning the past and facing the future of JOP management. This book neatly and precisely sets out the key principles of JOP management. It does not pretend to be a reference document but does cover all the salient information that anyone seeking to work in the industry needs to know. It is an absolute must-read for anyone joining the family of Facilities Management (FM) and JOP service providers in the rapidly expanding domain of community managers, all of which are key parts in the success story of Dubai.
