Structured in the format of a college lecture series, Antiaging 101 explains the lifestyle changes necessary to obtain and maintain optimal health and vitality. Learn how and why your diet, exercise program, supplements, hormones, and stress reduction impact your health and aging. By learning this material you will empower yourself and your family to make intelligent choices that will impact your health immediately. After this course you will know what foods to eat, what supplements to take, what exercise to do, and what hormones to utilize. Yes the program takes sacrifice and commitment, but in return you will have more energy, strength, and stamina. You will look better and you will be healthier. You will realize that each day, instead of being another step toward getting older, is actually an opportunity to get younger. This comprehensive approach to gender training in development encompasses work on gender awareness-raising and gender analysis at the individual, community and global level. An important reference source for development agency trainers and academics. This workbook and the accompanying online resources provide a one-stop reference manual to designing and delivering a

successful training course. Written in a practical and user-friendly style, The Training Design Manual provides both theory and practical exercises; guiding the reader through the total design process from start to finish. Theory and concepts are followed by practical application and a blend of text and graphics appeals to a wide range of learning styles. Accompanying online material includes design templates which the reader can use to record ideas as they progress through the book so that by the end, they will have a complete course design. In addition the website provides activities, examples and further course materials. In the field, seconds count. PHTLS: Prehospital Trauma Life Support for First Responders, Second Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Developed by the National Association of Emergency Medical Technicians (NAEMT) in cooperation with the American College of Surgeons Committee on Trauma (ASC-COT), PHTLS for First Responders, Second Edition reflects current, evidence-based knowledge and practice, and promotes critical-thinking as the foundation for providing quality care. Rapidly assessing a trauma patient to identify life-saving care is at the heart of PHTLS for First Responders, Second Edition. It takes 2 minutes or less for a patient to exsanguinate. No other intervention first responders perform is more important than stopping that level of bleeding in trauma patients. To reflect this, PHTLS for First Responders, Second Edition utilizes the XABCDE patient assessment mnemonic to place exsanguinating hemorrhage at the forefront of every patient encounter. The importance of XABCDE (eXsanguinating hemorrhage, airway, breathing, circulation, disability, and expose/environment) is reinforced in every clinical chapter. PHTLS for First Responders, Second Edition features a new course manual, which reinforces and clarifies key concepts from the course; features an engaging, interactive design; and is written so you feel like you are participating in a conversation, versus listening to a lecture. Obstetric emergencies are unplanned and often unanticipated. Management

requires a clear understanding of the life-saving and damage-limiting treatments that can be implemented. Preceded by: Skills training manual for treating borderline personality disorder / Marsha M. Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains

methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves. Updated and adapted for Australia and New Zealand, offering course guidance for the multi-professional management of obstetric emergencies. For more than a quarter century, *How to Be Your Dog's Best Friend* has been the standard against which all other dog-training books have been measured. This expanded edition preserves the best features of the original classic while bringing the book fully up-to-date. The result: the ultimate training manual for a new generation of dog owners--and, of course, for their canine best friends. The Monks of New Skete have achieved international renown as breeders of German shepherds and as outstanding trainers of dogs of all breeds. Their unique approach to canine training, developed and refined over four decades, is based on the philosophy that "understanding is the key to communication, compassion, and communion" with your dog. *How to Be Your Dog's Best Friend* covers virtually every aspect of living with and caring for your dog, including: Selecting a dog (what breed? male? female? puppy or older dog?) to fit your lifestyle Where to get--and where not to get--a dog Reading a pedigree Training your dog or puppy--when, where, and how The proper use of praise and discipline Feeding, grooming, and ensuring your dog's physical fitness Recognizing and correcting canine behavioral problems The particular challenges of raising a dog where you live - in the city, country, or suburb The proper techniques for complete care of your pet at every stage of his or her life In its scope, its clarity, and its authority, *How to Be Your Dog's Best Friend* remains unrivaled as a basic training guide for dog owners. Like no other book, this guide can help you understand and appreciate your dog's nature as well as his or her

distinct personality--and in so doing, it can significantly enrich the life you share with your dog. A manual to accompany the PROMPT (Practical Obstetric Multi-Professional Training) course, which covers a range of obstetric emergency situations.
