"Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmurak follows their development from ninth grade through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures. As this concise book explains, virtualization is a smorgasbord of technologies that offer organizations many advantages, whether you're managing extremely large stores of rapidly changing data, scaling out an application, or harnessing huge amounts of computational power. With this guide, you get an overview of the five main types of virtualization technology, along with information on security, management, and modern use cases. Topics include: Access virtualization—Allows access to any application from any device Application virtualization—Enables applications to run on many different operating systems and hardware platforms Processing virtualization—Makes one system seem like many, or many seem like one Network virtualization—Presents an artificial view of the network that differs from the physical reality Storage virtualization—Allows many systems to share the same storage devices, enables concealing the location of storage systems, and more Ranging from functional to whimsical, presents photographs of variations on the ceramic cup from such artists as Benjamin Schulman, Annette Gates, and Heather O'Brien. Originally published in 1986, and bringing together essays written over a 10 year period, this volume offers a coherent and challenging interpretation of the German past. The book argues that the German Empire between 1971 and 1914 may have enjoyed greater stability and cohesion than is often assumed. It suggests that Imperial Germany's political institutions showed considerable flexibility and capacity for growth and puts forward the idea that without WWI, or in the event of a German victory, the Empire might well have demonstrated its viability as a modern state. In that case, the origins of fascism should be sought mainly in the subsequent experiences of war, revolution and economic crisis and not so much in the Empire's so-called structural backwardness. In The Smoke at Dawn, the last great push of the Army of the Cumberland sets the stage for a decisive confrontation at Chattanooga that could determine the outcome of the war. Summer, 1863. The Federal triumph at Vicksburg has secured complete control of the Mississippi River from the Confederacy, cementing the reputation of Ulysses S. Grant. Farther east, the Federal army under the command of William Rosecrans captures the crucial rail hub at Chattanooga. But Rosecrans is careless, and while pursuing the Confederates, the Federal forces are routed in north Georgia at Chickamauga Creek. Retreating in a panic back to Chattanooga, Rosecrans is pursued by the Confederate forces under General Braxton Bragg. Penned up, with their supply lines severed, the Federal army seems doomed to the same kind of defeat that plagued the Confederates at Vicksburg. But a disgusted Abraham Lincoln has seen enough of General Rosecrans. Ulysses Grant is elevated to command of the entire theater of the war, and immediately replaces Rosecrans with General George Thomas. Grant gathers an enormous force, including armies commanded by Joseph Hooker and Grant's friend, William T. Sherman. Grant's mission is clear: Break the Confederate siege and destroy Bragg's army. Meanwhile, Bragg wages war as much with his own subordinates as he does with the Federals, creating dissension and disharmony in the Southern ranks, erasing the Confederate army's superiority at exactly the wrong time. Blending evocative historical detail with searing depictions of battle, Jeff Shaara immerses readers in the world of commanders and common soldiers, civilians and statesmen. From the Union side come the voices of Generals Grant, William Tecumseh Sherman, and George Thomas—the vaunted “Rock of Chickamauga”—as well as the young private Fritz “Dutchie” Bauer. From the Rebel ranks come Generals Bragg, Patrick Cleburne, and James Longstreet, as well as the legendary cavalry commander, Nathan Bedford Forrest. A tale of history played out on a human scale in the grand Shaara tradition, The Smoke at Dawn vividly recreates the climactic months of the war in the West, when the fate of a divided nation truly hangs in the balance. Praise for The Smoke at Dawn “Civil War history fiends will be riveted.”—Parade “A beautifully written novel . . . Shaara once again elevates history from mere rote fact to explosive and engaging drama.”—Bookreporter “Shaara's mastery of military tactics, his intimate grasp

of history, and his ability to interweave several supporting narratives into a cohesive and digestible whole . . . will appeal to a broad range of historical- and military-fiction fans.”—Booklist “Top-notch . . . As with the best historical war novels, knowing the ultimate outcome of the bitter fighting is not a bar to engagement.”—Publishers Weekly Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women’s military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women’s military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics. NEW YORK TIMES BESTSELLER • From Jeff Shaara comes the riveting final installment in the Civil War series that began with A Blaze of Glory and continued in A Chain of Thunder and The Smoke at Dawn. November 1864: As the Civil War rolls into its fourth bloody year, the tide has turned decidedly in favor of the Union. A grateful Abraham Lincoln responds to Ulysses S. Grant’s successes by bringing the general east, promoting Grant to command the entire Union war effort, while William Tecumseh Sherman now directs the Federal forces that occupy all of Tennessee. In a massive surge southward, Sherman conquers the city of Atlanta, sweeping aside the Confederate army under the inept leadership of General John Bell Hood. Pushing through northern Georgia, Sherman’s legendary March to the Sea shoves away any Rebel presence, and by Christmas 1864 the city of Savannah falls into the hands of “Uncle Billy.” Now there is but one direction for Sherman to go. In his way stands the last great hope for the Southern cause, General Joseph E. Johnston. In the concluding novel of his epic Civil War tetralogy, Jeff Shaara tells the dramatic story of the final eight months of battle from multiple perspectives: the commanders in their tents making plans for total victory, as well as the ordinary foot soldiers and cavalrymen who carried out their orders until the last alarm sounded. Through Sherman’s eyes, we gain insight into the mind of the general who vowed to “make Georgia howl” until it surrendered. In Johnston, we see a man agonizing over the limits of his army’s power, and accepting the burden of leading the last desperate effort to ensure the survival of the Confederacy. The Civil War did not end quietly. It climaxed in a storm of fury that lay waste to everything in its path. The Fateful Lightning brings to life those final brutal, bloody months of fighting with you-are-there immediacy, grounded in the meticulous research that readers have come to expect from Jeff Shaara. Praise for The Fateful Lightning “Powerful and emotional . . . highly recommended.”—Historical Novels Review “Outstanding . . . Shaara combines his extensive knowledge of military history with his consummate skill as a storyteller.”—Booklist “Readers . . . looking for an absorbing novel will be well rewarded.”—The Clarion-Ledger “A great accomplishment and a more than fitting conclusion to Shaara’s work on the Civil War.”—Bookreporter This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the program. Filling a notable gap in research addressing the ADHD college student population, CBT for College Students with ADHD is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults. Programming with JAVA, 3e, incorporates all the updates and enhancements added to JAVA 2 and J2SE 5.0 releases. "The "Computers Nobody Wanted" is a history of an ill-conceived acquisition, in 1969, of Xerox's entry into the computer business to its subsequent abandonment. The text discusses attempts to convert a superior scientific computer to replace Xerox' own IBM computers that were processing business applications. The author was responsible for managing these conversions against technical obstacles that could not be overcome. After spending tens of millions for technology improvements, Xerox decided to exit from the computer business. The book also traces investments in a computer workstation - the STAR computer - from conception in 1973 to its dissolution in 1984. It describes the pioneering research at the Xerox PARC (Palo Alto Research Center) and how an inspired group produced superb innovations that were of no commercial value. During this epoch Strassmann was Vice-President of Strategic Planning for the Information Products Group that was responsible for transfer of PARC results to the marketplace.
