" Gain an in-depth understanding of changes in technical services that have taken place over a quarter century and look at future trends and changes that may occur. Technical Services Management surveys and analyzes technical services in libraries from 1965 to 1990, a formative period and one of great change in library operations. The book also identifies trends that continue to impact technical services operations in libraries today. Readers gain a comprehensive knowledge of where the field has been and where it is now to help them plan and prepare more effectively for the future. Most chapters are historical, combined with a firm grasp of the present and a glimpse or more at the future. They are grouped to reflect the various aspects of technical services. Trends in technical services are considered in chapters on the development of technical services literature and the major changes in technical services in school libraries. Chapters on the major subdivisions within technical services--acquisitions and collection development, cataloging, and preservation--trace changes in library operations and the impact of automation. Issues in catalog design are explored in chapters on the emergence of online public access catalogs, bibliographic utilities, and approaches to authority control. Efforts to improve subject access are addressed through chapters on subject cataloging, the Dewey Decimal Classification, and indexing in the U.S. and Great Britain. To keep pace with changes in technical services, changes in professional education and development are needed as documented in chapters on cataloging education, continuing education in technical services, and the role of professional organizations. The final chapter outlines new challenges in the future and new roles for librarians in an electronic environment. Effective planning for the future includes learning about the past. Technical Services Management, 1965--1990 is a vital resource for library historians, library educators, technical services librarians, and graduate students in library and information science who need to know "how things were" in order to see more clearly "how things will be." First published in 1912, French's Index of Differential Diagnosis helps clinicians in the differential diagnosis of any condition which may be seen in hospital or general practice. Arranged alphabetically by symptom, the text helps readers identify each presentation, describes the different diagnoses that it could represent, and explains the tests Contains 10,955 monographs describing significant chemicals, drugs, and biological substances. The entries are not a listing of Merck & Co., Inc. products, but rather cover a wide range of compounds, which have been selected on the basis of present or historic importance and interest. Each monograph is a concise description of a single substance or a small group of closely related compounds. The information provided includes chemical, common and generic names, trademarks and their associated companies, Chemical Abstracts Service (CAS) Registry Numbers, molecular formulas and weights, physical and toxicity data, therapeutic and commercial uses, citations to the chemical, biomedical and patent literature, and chemical structures. Also includes: Organic Name Reactions: this section is comprised of 446 named reactions and an index. A concise reference history and associated reaction schema are provided for each reaction or sub-reaction. Additional tables: a compilation of over 60 p. of tables including a glossary is provided to supplement the material presented in the monographs. Bowstead and Reynolds on Agency is the leading reference book on this key aspect of commercial law. First published in 1896, it is the trusted and authoritative guide to the maze of old and modern case law and statutes. Building on the excellence of previous editions, this new edition has been extensively revised and updated, and considers the substantial body of case law that has been generated since the 17th edition. In an area of law which is predominantly case driven, there have been changes to every chapter of the book. * A new edition of the definitive text on agency law * Provides completely authoritative coverage of a complex subject there have been changes to every chapter of the book and that in an area of law which is predominantly case driven it is vital to keep up to date with what has been happening in this field * Extensively revised, particularly in the areas of... * International perspective, making frequent use of parallels from other common law countries, particularly Australia, New Zealand and Canada Forlaget beskrivelse: Printed book plus Pageburst access. Most of us give little thought to the back of the book—it's just where you go to look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years. This volume provides definitive guidance on the formulation and conduct of company, local authority and public meetings. Culinary Landmarks is a definitive history and bibliography of Canadian cookbooks from the beginning, when La cuisinière bourgeoise was published in Quebec City in 1825, to the mid-twentieth century. Over the course of more than ten years Elizabeth Driver researched every cookbook published within the borders of present-day Canada, whether a locally authored text or a Canadian edition of a foreign work. Every type of recipe collection is included, from trade publishers' bestsellers and advertising cookbooks, to home economics textbooks and fund-raisers from church women's groups. The entries for over 2,200 individual titles are arranged chronologically by their province or territory of publication, revealing cooking and dining customs in each part of the country over 125 years. Full bibliographical descriptions of first and subsequent editions are augmented by author biographies and corporate histories of the food producers and kitchen-equipment manufacturers, who often published the books. Driver's excellent general introduction sets out the evolution of the cookbook genre in Canada, while brief introductions for each province identify regional differences in developments and trends. Four indexes and a 'Chronology of Canadian Cookbook History' provide other points of access to the wealth of material in this impressive reference book. A classic textbook and a student favourite, Tidy's Physiotherapy aims to reflect contemporary practice of physiotherapy and can be used as a quick reference by the physiotherapy undergraduate for major problems that they may encounter throughout their study, or while on clinical placement. Tidy's Physiotherapy is a resource which charts a range of popular subject areas. It also encourages the student to think about problem-solving and basic decision-making in a practice setting, presenting case studies to consolidate and apply learning. In this fifteenth edition, new chapters have been added and previous chapters withdrawn, continuing its reflection of contemporary education and practice. Chapters have again been written by experts who come from a wide range of clinical and academic backgrounds. Can the Dewey Decimal System meet the needs of the rapidly changing information environment? Moving Beyond the Presentation Layer explores the Dewey Decimal System from a variety of perspectives, each of which peels away a bit of the "presentation layer"—the familiar linear notational sequence—to reveal the content and context offered by the DDS. Library professionals from around the world examine how the content and context offered by the DDS can evolve to meet the needs of the changing information environment, with a special focus on the impact of the Internet on current and future developments. Moving Beyond the Presentation Layer examines whether the Dewey Decimal System is a rigid structure best suited to a physical information environment or a polymorphic one that can be adapted to meet a variety of physical and virtual needs. This unique book reviews the 40-year history of the online use of classification systems, the development of the Relative Index over 22 editions of the DDC, recommendations to ensure the viability of the DDC in a time of mass digitization, using DDS in an environment where it hasn't been used before, teaching the DDS, special issues related to the use of the DDS in Europe, North America, and Africa, and the future of online classification. Topics examined in Moving Beyond the Presentation Layer include: using the DDC as the browsing mechanism for resource discovery classification as an online cataloging tool classification as an online end-user tool browser behavior in a DDC-based Web service the role of the DDS in the ongoing HILT (High-Level Thesaurus) project using the DDS to organize Web resources localization and interoperability in knowledge organization mapping terminologies to classification systems the DeweyBrowser and much more Moving Beyond the Presentation Layer is an essential professional resource for librarians, information scientists, computer scientists, and metadata and Web services specialists.
