This comprehensive book analyses the development of the legislatures in the Iberian countries over the past 40 years, since democracy was introduced, to comparatively understand their role in these political systems and in sustaining their democratic systems. Sharing many historical developments and institutional characteristics, Spain and Portugal also present crucial differences, notably Spain's pure parliamentary system, a King as Head of State and a quasi-federal structure, and Portugal's semi-presidential democracy. Starting with a historical and institutional contextualization of these two legislatures, the book examines the most important organizational and behavioural features of legislative life in Iberian legislatures in a comparative perspective. It also shows how new legislatures develop resilience capacity to support lasting democratic systems as fully fledged institutionalized bodies. This book will be of key interest to scholars and students of Spain and Portugal, legislative politics and parliamentarianism, and more broadly to European politics and comparative politics, journalists and practitioners. Draws together a team of nine country specialists to analyze parliamentary government in Western Europe. The contributors explore the parliaments of Britain, Germany, Italy, Belgium, Ireland, Portugal, and the EU. Concludes with a chapter that examines the volume's two theses: that the type of legislature in each country is determined by institutional environment; and that members of the legislature can make some difference to the capacity of the institution to constrain the executive. Distributed by ISBS. Annotation copyrighted by Book News, Inc., Portland, OR This new edition has been written by Keith Cuninghame, a member of the senior management team in the House of Commons Library, United Kingdom, for 13 years until he retired in 2006, a regular attendee at IFLA conferences and a participant in the work of the Section for eight years. He has been supported by an advisory group of seven people from around the world with a wide range of experience between them. When they meet, staff of parliamentary libraries are often struck by what they have in common, even though there may be great differences between the institutions they work for and their political contexts. The libraries of legislatures are institutions that, by the simplest definition are special libraries. They serve the particular and defined clientele of Members of Parliament, together with their personal staff. They also support the institution as a whole and may have additional roles for example a curatorial one, or one providing information about parliament to the public and schools. This publication is devoted to developing an understanding of the new roles of parliamentary committees in the quest for effective parliamentary influence in and contribution to democratic government. The Impact of Legislatures brings together key articles and path-breaking scholarship published in The Journal of Legislative Studies during its first 25 years of publication, enabling the reader to make sense of the impact of the legislature in the modern world. Encompassing theory, comparative analysis and county-based empirical studies, the volume examines the impact of legislatures as the key representative institutions of nations, addressing their relationships both to government and to the people. Legislatures are ubiquitous. They provide legitimacy to measures of public policy and to government. As such, they are key to how a nation is governed. But they do much more than confer legitimacy. They are generally multi-functional and functionally adaptable bodies, and are an essential link between citizen and government. However, scholarship on them has not been extensive and often been descriptive and country-specific, limiting the capacity to make sense of them as a particular species of institution. The chapters in this volume reflect scholarship that helps the reader appreciate the significance of the place and consequences

of legislatures, examining not only the relationship between the legislature and the executive, but also the oft-neglected relationship between legislatures and the people. Reflecting the growing body of research in the field of legislative studies, carried by The Journal of Legislative Studies since its inception in 1995, The Impact of Legislatures is essential reading for anyone wishing to understand the impact of legislatures in the world today. The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems. The existence of noticeable 'unified' parties is central to the theory and practice of democracy in general, and to parliamentary democracy in particular. However, legislative studies scholars have good reason to cease treating parties as monolithic, unitary actors, for they evidently are not. The first step in this direction is to ask why one of the distinguishing features of modern political parties is their legislative unity. Do parties enter parliament as unified actors, or are they moulded into this model by the legislature? The answer depends on whether one is looking at cohesion or at discipline. The goal of this collection of articles is to present a conceptual delineation between these two key concepts. This book was previously published as a special issue of the Journal of

Legislative Studies. The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873) The Making of Modern Law: Foreign, Comparative and International Law, 1600-1926, brings together foreign, comparative, and international titles in a single resource. Recent years have witnessed substantial work in the legislative studies field. But what do we know about legislatures today and are there clear criteria for comparing and classifying them? This is a new review of the state of our knowledge of parliament and tackles key questions: Do legislatures matter in legislative terms, and, if so, how much? What is the extent of the legislature's control of the legislative process. How can we classify legislatures on the basis of their relative legislative performance. Five measures of the policy power of parliaments are applied in the country/region chapters.
