Mastering Basic Skills(R) First Grade includes comprehensive content on skills first graders need most. Topics include reading

comprehension, phonics , language arts, grammar, writing, time and money, and math. The Mastering Basic Skills(R) series includes grade-specific math and language arts activities as well as reading lists, skills checklists, awards, and mini books. The comprehensive content and extra features increase the value of this series making it an appealing choice to parents looking for extra at-home practice for their child. Big Skills for Little Hands helps early learners prepare for kindergarten by building important basic and motor skills! I Know My Numbers! includes creative hands-on activities for each number 0-25, which emphasize counting, identifying quantities, and writing skills. Young learners will practice following directions, using pencils and scissors, pasting, and improving hand-eye coordination while learning their 123s. A bonus write-and-wipe page at the back of the book offers space for practicing additional fine motor activities. The activities in this workbook support national standards for early childhood (NAEYC). After completing this book, young learners will be proud to say "I Know My Numbers!" 80 perforated color pages. Educational workbooks in the Brighter Child "RM" Series teach basic learning skills and have been designed by professionals to

encourage student/parent interactive study. -- Foil-stamped and embossed covers -- Easy-to-understand directions -- Review pages Excel Maths: Addition and Subtraction for Year 5 and Year 6 is designed to help make students feel confident in the basic processes of addition and subtraction of whole numbers. It will help to satisfy the needs of slower learners, and provide enrichment opportunity for quicker learners. Mathematics is a highly important subject in our school syllabus. It is the study of numbers - which surround us everywhere in our lives. Computers and calculators have become the order of the day and are quite handy, but the human mind still controls it. Whatever we put into the mind during the child's formative years is extremely important and most significant for the years to come. In this book your child will find: eight self-contained, carefully graded units hundreds of practice exercises quick questions and revision pages to stay in touch with previous work diagnostic and mastery test to measure student's knowledge a lift-out answer section Contents: tables language and mathematics diagnostic test whole numbers addition of whole numbers to 999 subtraction of whole number to 999 order of operations with addition and subtraction answers addition of

whole numbers to 9999 subtraction of whole numbers to 9999 addition of whole numbers beyond 9999 subtraction of whole numbers beyond 9999 mastery test Excel Maths: Whole Numbers, Decimals, Percentages and Fractions is designed for students in Year 7 who require extra attention in their Basic Number Skills. To be successful in mathematics, students must have a solid foundation in place for their high school maths to build on. These skills include a firm understanding of basic number work without reliance on calculators. This book looks at the important number skills for Year 7 and provides clearly set out explanations and examples for both students and parents to follow. Practice questions are then provided to build the confidence of the student. In this book you will find: self-contained units of work with hundreds of practice questions tests at the start of each unit to identify any problem areas step-by-step worked examples review tests for each unit, and two end-of-year tests, allowing students to monitor their progress answers to all questions Author : Allyn Jones Skills for Scholars Basic Skills Helpers provides children in kindergarten additional instruction in basic skills necessary for the school year ahead. Offering 80 pages of full-color

activities, perforated pages, easy-to-follow directions, and complete answer key, children will have fun learning basic skills. Features activities that teach: Colors & shapes Same & different Opposites Letters A to Z Beginning & ending consonants Short vowels Rhyming words Name, address & phone numbers Sequencing & ordinal numbers More & fewer Time & money Graphing Thinking skills The popular Skills for Scholars Workbook series offers a full complement of instruction, activities, and information in 51 subject-specific workbooks. Encompassing preschool to grade 6, this series covers key subjects including basic skills, English & grammar, math, phonics, reading, science, and Spanish. This series is designed for students who need intervention or enrichment and gives them a solid foundation in key skills necessary for success in the classroom! This engaging book--with 24 pages of stickers--focuses on three main early-learning concepts: colors, numbers, and shapes. Each activity, be it choosing the correct color to fill in a picture, finding the hidden triangle, or helping a squirrel count his acorns, stimulates learning through play and enhances the child's cognitive development. The activities become progressively more complex according to the

three stages of a child's learning. Mastering Basic Skills(R) Prekindergarten includes comprehensive content for early learners. Topics include fine motor and printing skills, basic concepts, colors and shapes, numbers, readiness skills, alphabet, and safety. The Mastering Basic Skills(R) series includes grade-specific math and language arts activities as well as reading lists, skills checklists, awards, and mini books. The comprehensive content and extra features increase the value of this series making it an appealing choice to parents looking for extra at-home practice for their child. This new set of resources, comprising three Worksheet Packs and a textbook, have been designed specifically for the new Adult Numeracy Curriculum, covering Entry Levels 1, 2 and 3 and Levels 1 and 2. All topics within the resources are clearly labelled with a curriculum reference to assist with planning. Mental Maths is the Maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the 'etricks', we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Even though calculators and

computers play an enormous role in the modern world, we still need to go back to the basics & we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include: 32 double-page units of Mentals are included & 8 units for each school term each unit is divided into four sets (A,B,C and D) of 15 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 15 always covers geometry a special 'Help' section,, at the front of the book gives different strategies and explanations to help students solve Mentals problems . These are also numbered so they link to the question numbers in each Mentals unit a 'Fun Spot',, unit, containing fun activities, and a 'Revision',, unit are included at the end of each 8 units extra practice,, sections which reinforce particular strategies appear in the lower part of each page answers

to all questions are in a lift-out section in the centre of the book This book provides a resource that can be used by tutors who deliver Key Skills and Adult Numeracy and students who are working towards End Assessment at Level 2. It contains 12 multiple-choice question papers, each containing 40 multiple-choice questions. These papers aim to assess candidates' ability to interpret information from tables, diagrams, charts and graphs and use calculations involving: * numbers, fractions, decimals and percentages; * amounts and proportion; * whole, positive and negative numbers; * mean, mode, median, range; * metric and imperial measures and conversion; * currency; * time and temperature; * weight and capacity; * area, perimeter and volume; * ratio and scale; * levels of accuracy and estimation; * formulae. The opportunity to practise many End Assessment papers will encourage an understanding of the techniques involved and will engender confidence and competence for the test. The book also contains the answers and photocopiable answer sheets. The Author Elizabeth Jones is a Key Skills practitioner with experience of delivering, assessing and verifying mandatory and wider Key Skills in various educational settings including

secondary schools, sixth form colleges, further education colleges, vocational training agencies, young offender institutes and adult education classes. She has designed questions set in a range of vocational training contexts: art and design, animal management, built environment, business administration, call centre training, design technology, hair and beauty, health and social care, hospitality and catering, information communication technology, motor vehicle, nursery nursing, painting and decorating, sports sciences and woodworking. Mental Maths is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the tricks, we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics % we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its

primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include:- 32 double-page units of Mentals are included % 8 units for each school term each unit is divided into four sets (A,B,C and D) of 20 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 20 always covers geometry a special e'Help' section,, at the front of the book gives different strategies and explanations to help students solve Mentals problems. These are also numbered so they link to the question numbers in each Mentals unit a eFun Spot,, unit, containing fun activities, and a eRevision,, unit are included at the end of each 8 units extra practice,, sections which reinforce particular strategies appear in the lower part of each page answers to all questions are in a lift-out section in the centre of the book Mastering Basic Skills(R) Second Grade includes comprehensive content essential to second graders. Topics include reading comprehension, phonics , language arts, grammar, writing, time and money, and math. The Mastering Basic Skills(R) series includes grade-specific math and language arts activities as well as reading lists, skills

checklists, awards, and mini books. The comprehensive content and extra features increase the value of this series making it an appealing choice to parents looking for extra at-home practice for their child. Excel Basic Skills: Times Tables 1 provides a solid and comprehensive approach for your child to learn their times tables. Multiplication is one of the basic skills in Mathematics that all children need to know. In this book your child will find: A new and comprehensive approach to learning tables A wide variety of activities An emphasis on oral counting, language and patterns Carefully sequenced units A lift-out answer section Upon completing this book, your child will have mastered the $\times 1$, $\times 2$, $\times 3$, $\times 4$, $\times 5$ and $\times 10$ tables. Year 5 Ages 10-11 years old. In Excel Basic Skills: English and Mathematics Year 5 your child will find: thirty carefully graded double-page units. Each unit has work on numbers, measurement and shape in Maths and comprehension, grammar, punctuation, spelling and vocabulary in English. a wide variety of interesting exercises four term reviews to test work covered each term marking grids to identify strengths and weaknesses a lift-out answer section This book aims to build basic skills in reading, comprehension and maths.
