The Leap Year Project Dec 28 2019 Victor Saad is an ordinary guy who took an extraordinary leap - quitting his job to create his own Master's program through 12 experiences in 12 months that, together, proved to be the most challenging, enlightening, and transformational year of his life. He invited others to leap with him, charging them with the question, "What risk would you take to change your life, your community, or your world for the better?" These are their stories.

The School Leader's Year Aug 16 2021 This practical handbook offers a month-by-month guide to the curriculum, assessment, progress, and leadership over the school year. It provides a clear, comprehensive, and coherent structure to the academic year helping school leaders to prioritise their time and workload, supporting them and their team to work as efficiently and effectively as possible. Considering the statutory

and key leadership activities from admissions, induction, transitions, and parents' evenings to coursework, timetabling, assessment, staff performance, and much more, the book provides a clear plan of action to ensure school leaders have prepared their work at the optimal time over the year. Each chapter features tried-and-tested strategies to help schools put robust systems and processes in place alongside guidance on sustaining pace, developing resilience, and exam preparation and technique. Full of practical tips to help improve progress and including real-world examples of leadership in action from leaders working in primary and secondary schools, this is essential reading for all school leaders that want their students to be as successful as they can possibly be in every lesson, every day.

30 Years of the Landau Institute — Selected Papers

Feb 19 2022 The Landau Institute for Theoretical Physics was created in 1965 by a group of LD Landau's pupils. Very soon, it was widely recognized as one of the world's leading centers in theoretical physics. According to Science Magazine, the Institute in the eighties had the highest citation index among all the scientific organizations in the former Soviet Union. This collection of the best papers of the Institute reflects the development of the many directions in the exact sciences during the last 30 years. The reader can find the original formulations of well-known notions in condensed matter theory, quantum field theory, mathematical physics and astrophysics, which were introduced by members of the Landau Institute. The following are some of the achievements described in this book: monopoles (A Polyakov), instantons (A Belavin et al.), weak crystallization (S Brazovskii), spin superfluidity (I Fomin), finite band potentials (S Novikov) and paraconductivity (A Larkin, L Aslamasov). Contents: Condensed Matter: Phase Transition in Uniaxial Ferroelectrics (A I Larkin & D E Khmel'nitskii) Contribution to the Theory of Domain Structures (I A Privorotskii) Correlation Functions of a One-Dimensional Fermi System with Long-Range Interaction (Tomonaga Model) (I E Dzyaloshinskii & A I Larkin) Investigation of Singularities in Superfluid He₃ in Liquid Crystals by the Homotopic Topology Methods

(G E Volovik & V P Mineev)Towards an Exact Solution of the Anderson Model (P B Wiegmann)Long Wavelength Dynamics of Free Smectic Films (E I Kats & V V Lebedev)The Augmented Models of Associative Memory Asymmetric Interaction and Hierarchy of Patterns (M V Feigelman & L B Ioffe)Superconductivity Transition Temperature in Amorphous Film (A M Finkel'shtein)Mathematical Physics:A Scheme for Integration the Nonlinear Equations of Mathematical Physics by the Method of the Inverse Scattering Problem (V E Zakharov & A B Shabat)Note on the Integration of Euler's Equations of the Dynamics of an n-Dimensional Rigid Body (S V Manakov)Extension of the Module of Invertible Transformations. Classification of Integrable Systems (A V Mikhailov et al.)Field Theory and Nuclear Physics:Particle Spectrum in Quantum Field Theory (A M Polyakov)Pseudoparticle Solutions of the Yang-Mills Equations (A A Belavin et al.)Infinite Conformal Symmetry in Two-Dimensional Quantum Field Theory (A A Belavin et al.)Conformal Algebra and Multipoint Correlation Functions in 2d Statistical Models (V Dotsenko & V A Fateev)Higgs and Top Quark Masses in the Standard Model without Elementary Higgs Boson (V N Gribov)Astrophysics:Spectrum of Relict Gravitational Radiation and the Early State of the Universe (A A Starobinskii)and other papers

Readership: Graduates and researchers in theoretical physics. keywords: "The articles reprinted in this volume are impressive. Many of these articles are still

referenced, and even more are the basis for experimental and theoretical studies today."

Mathematical Reviews "This collection of the best papers of the Institute reflects the development of the many directions in the exact sciences during the last 30 years. The reader can find the original formulations of well-known notions in condensed matter theory, quantum field theory, mathematical physics and astrophysics, which were introduced by members of the Landau Institute." The Future Leader Apr 11 2021 WINNER OF CMI MANAGEMENT BOOK OF THE YEAR 2021 Are you a future-ready leader? Based on exclusive interviews with over 140 of the world's top CEOs and a survey of nearly 14,000 people. Do you have the right mindsets and skills to be able to lead effectively in the next ten years and beyond? Most individuals and organizations don't even know what leadership will look like in the future. Until now. There has been a lot written about leadership for the present day, but the world is changing quickly. What worked in the past won't work in the future. We need to know how to prepare leaders who can successfully navigate and guide us through

the next decade and beyond. How is leadership changing, and why? How ready are leaders today for these changes? What should leaders do now? To answer these questions, Jacob interviewed over 140 CEOs from companies like Unilever, Mastercard, Best Buy, Oracle, Verizon, Kaiser, KPMG, Intercontinental Hotels Group, Yum! Brands, Saint-Gobain, Dominos, Philip Morris International, and over a hundred others. Jacob also partnered with LinkedIn to survey almost 14,000 of their members around the globe to see how CEO insights align with employee perspectives. The majority of the world's top business leaders that Jacob interviewed believe that while some core aspects of leadership will remain the same, such as creating a vision and executing on strategy, leaders of the future will need a new arsenal of skills and mindsets to succeed. What emerged from all of this research is the most accurate groundbreaking book on the future of leadership, which shares exclusive insights from the world's top CEOs and never before seen research. After reading it, you will:

- Learn the greatest trends impacting the future of leadership and their implications
- Understand the top skills and mindsets that leaders of the future will need to possess and how to learn them
- Change your perception of who a leader is and what leadership means
- Tackle the greatest challenges that leaders of the future will face
- See the gap that exists between what CEOs identified versus what employees are actually experiencing
- Become a future-ready leader

This is the book that you, your team, and your organization must read in order to lead in the future of work.

Improving the First Year of College Mar 23 2022 The first year of college represents an enormous milestone in students' lives. Whether attending a four-year or two-year institution of higher education, living on campus or at home, or enrolled in a highly selective school or a college with an open-admissions policy, students are challenged in unique and demanding ways during their first year. Although many students rise to the challenges they face, for some the demands are too great. Retention rates beyond the first year are disappointing: one third of first-year students seriously consider leaving college during their first term, and

ultimately one half of all students who start college complete it. What are the factors that impact students during their first year? How can the academic and social experiences of first-year students be optimized? What can we do to improve retention rates to maximize the number of students who complete college? Improving the First Year of College employs a variety of perspectives from leading researchers and student-service providers to address these questions and examine the first year of college. This volume also highlights the development of learning communities and coaching, as well as how technology impacts students' first year. Perhaps most important, the book provides examples of "best practices," as determined through research by leaders in the field, to permit educators to draw on their experiences.

Annual Report for the School Year Ending ... Oct 06 2020

To Err Is Human Aug 23 2019 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has surrounded medical errors and their

consequenceâ€"but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agendaâ€"with state and local implicationsâ€"for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errorsâ€"which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. *To Err Is Human* asserts that the problem is not bad people in health careâ€"it is that good people are working in bad systems that need to be

made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates"as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

The School Years Jun 25 2022 The School Years provides a challenging and lively collection of essays on key issues affecting young people in the school setting. It is an essential book for all those concerned with adolescence and education. Since the first edition in 1979, major social changes such as unemployment,

AIDS, issues of race and gender, and increasing divorce rates have had a direct impact on education and young people. With these dramatic changes in mind, the contributors take an entirely new and up-to-date approach to current controversial issues such as the relationship of home and school, gender roles, morality, delinquency, and peer groups. Contributors include: John Coleman, Trust for the Study of Adolescence; T. Honess, School of Psychology, University of Wales; Peter Kutnick, Department of Education, University of Sussex; Sally Archer, Trenton State College, USA; Philida Salmon, Institute of Education, University of London; Maurice Chazan; David P. Farrington, Institute of Criminology, Cambridge.

Randolph Macon College in the Early Years Sep 28
2022 This book summarizes the history of the first Randolph Macon College, and how it intertwined with the Boydton, Virginia, community. While in Boydton, almost 300 students took a degree. This book tracks the lives of these graduates, many from before college, after graduation, throughout their participation in the Confederate government or military, after the War, and for many, until death. In pursuing the research, the author came across an additional 100 men who had attended RMC, and their stories are included as well, along with the chaplains for the college chapel, the

tutors for the college students and all adjunct and full-time faculty for the 38 year period. The graduates include 52 college presidents and numerous members of Congress. Many leaders of society, education and politics began their careers at RMC.
