Alex and Bobbie, who both like to play poker. Alex is a professional poker player who plays for a living and is a solid long-term winner. Bobbie is a recreational player who plays a decent enough game but mainly wants to have a good time. If you play poker regularly you will meet thousands of players like Bobbie in your games and very few like Alex. Of course one would expect that, in the long run, Alex will perform better than Bobbie. But have you ever wondered EXACTLY what it is that Alex understands better and does differently to Bobbie? This is a rather complex question that does not have a simple answer. In this book, UCLA maths professor Duncan Palamourdas addresses this question via a journey through human psychology, game theory, easy-to-understand mathematics and even philosophy. Topics include: * Understanding the instinctive but unprofitable tendencies of inexperienced players. * How to identify what a mistake actually is in poker - and how to exploit it. * Why poker does not revolve around bluffing. * The great impact of variance in poker and how to account for it. * How to develop a consistent approach that allows you to play like Alex and not Bobbie. The world of maths can seem mind-boggling, irrelevant and, let's face it, boring. This groundbreaking book reclaims maths from the geeks. Mathematical ideas underpin just about everything in our lives: from the surprising geometry of the 50p piece to how probability can help you win in any casino. In search of weird and wonderful mathematical phenomena, Alex Bellos travels across the globe and meets the world's fastest mental calculators in Germany and a startlingly numerate chimpanzee in Japan. Packed with fascinating, eye-opening anecdotes, Alex's Adventures in Numberland is an exhilarating cocktail of history, reportage and mathematical proofs that will leave you awestruck. I, Alex Cross Detective Alex Cross is pulled out of a family celebration and given the devastating news that his niece, Caroline, has been found brutally murdered. Cross vows to hunt down the killer, and soon learns that Caroline was mixed up in one of Washington's wildest scenes. And she was not this killer's only victim. The search leads Cross to a place where every fantasy is possible, if you have the credentials to get in. Alex is soon facing down some

very important, very protected, very dangerous people in levels of society where only one thing is certain - they will do anything to keep their secrets safe. Cross Fire Detective Alex Cross is planning his wedding to the woman he loves, Brianna Stone. But this blissful existence begins to unravel when Cross is called to the scene of the perfectly executed assassination of two of Washington DC's most corrupt and publically hated political figures. As more crooked politicians are picked off with similar long-range shots, public opinion is divided - is the marksman a vigilante or a hero? Media coverage of the case explodes, and the FBI assigns agent Max Siegel to the investigation. As Cross and Siegel battle over jurisdiction, Alex receives a call from his deadliest adversary, Kyle Craig. The Mastermind is in DC and will not stop until he has eliminated Cross, and his family, for good.

Alex Miller: The Ruin of Time is the first sole-authored critical survey of the respected Australian novelist's eleven novels. While these books are immediately accessible to the general reading public, they are manifestly works of high literary seriousness - substantial, technically masterful and assured, intricately interconnected, and of great imaginative, intellectual and ethical weight. Among his many prizes and awards, Alex Miller has twice won the Miles Franklin Literary Award, for The Ancestor Game in 1993, and Journey to the Stone Country in 2003; the Commonwealth Writers' prize, also for The Ancestor Game in 1993; and the New South Wales Premier's Literary Awards Christina Stead Prize, for Conditions of Faith in 2001 and Lovesong in 2011. He received a Centenary Medal in 2001 and the Melbourne Prize for Literature in 2012. In 2011 he was elected a Fellow of the Australian Academy of the Humanities. Having published his eleventh novel, Coal Creek, in 2013 - which won the Victorian Premier's Fiction Award in 2014 - Miller is currently writing an autobiographical memoir with the working title 'Horizons'. This is the first systematic analysis of the different ways in which Roman imperial lineage was represented in the various 'media' through which images of emperors could be transmitted. Rather than focusing on individual rulers of the Roman Empire, it evaluates evidence over an extended period of

time and differentiates between various types of sources, such as inscriptions, sculpture, architecture, literary text, and particularly central coinage, which forms the most convenient source material for a modern reconstruction of Roman representations of power over a prolonged period of time. 20 years ago Pepperberg set out to discover whether results of pigeon studies necessarily meant that other birds were incapable of mastering cognitive concepts and the rudiments of referential speech. This is a synthesis of her studies. Dark rituals drag London mage Alex Verus into the center of a conspiracy in this thrilling novel from the national bestselling author of Marked. Since his second sight made him infamous for defeating powerful dark mages, Alex Verus has been keeping his head down. But now he's discovered the resurgence of a forbidden ritual. Someone is harvesting the life-force of magical creatures—destroying them in the process. And draining humans is next on the agenda. Hired to investigate, Alex discovers not everyone on the Council wants him delving any deeper. Struggling to distinguish ally from enemy, he finds himself the target of those who would risk their own sanity for power. Alex still has the advantage of seeing the future—but he might not have a future for much longer. How well do you know the story of the real King Richard III? The Swan name is inseparable from the history of Wyoming and the West, and when Swan made his mark in Wyoming in the 1880s, ranching was king. The largest among Alex Swan's many corporate creations, The Swan Land and Cattle Company, Ltd., was one of the larger livestock companies to operate in the American West, and it survived long after it founder's financial debacle in the great winter of 1886-1887. At one time, the Swan was said to be the largest private landowner in Wyoming, and at its peak it was certainly one of the largest sheep companies in the country. This new work for the first time relates the life of Alex Swan, and offers a complete history of the Swan companies. Lawrence M. Woods has combed the surviving corporate records and other documents held in the United States and abroad. At the height of his financial life, Swan was said to be the richest man in Wyoming Territory, and his influence extended beyond business affairs to community service, both in Wyoming and in Iowa. Yet, after his dramatic financial collapse, there were many who ridiculed what he had done, and Swan's silence has left those criticisms on the record, without rebuttal. Swan, a leader in the Wyoming Stock Growers Association from its founding in 1873, served as its second president. Promoting the use of Hereford cattle on the high plains, he was a force in the Wyoming ranching world,

especially after his move to Cheyenne in 1874. Woods details Swan's life in the years after his separation from the Scottish-controlled Swan Land and Cattle Company, especially his activities in Ogden, Utah. The Swan companies continued operation into the mid-twentieth century. John Clay played a major role in their operation, and he figures prominently in their story. Alex Swan and the Swan Companies is an important portrait of the inner workings of the western cattle industry and its leaders. The book has a bibliography, index, and three appendices. It is bound in rich brown linen cloth and has a foil stamped spine and front cover. Western Lands and Waters Series, XXII 7 fun and easy projects that kids and adults will love.
