Sweet Reason: A Field Guide to Modern Logic, 2nd Edition offers an innovative, friendly, and effective introduction to logic. It integrates formal first order, modal, and non-classical logic with natural language reasoning, analytical writing, critical thinking, set theory, and the philosophy of logic and mathematics. An innovative introduction to the field of logic designed to entertain as it informs Integrates formal first order, modal, and non-classical logic with natural language reasoning, analytical writing, critical thinking, set theory, and the philosophy of logic and mathematics Addresses contemporary applications of logic in fields such as computer science and linguistics A web-site ([www.wiley.com/go/henle](http://www.wiley.com/go/henle)) linked to the text features numerous supplemental exercises and examples, enlightening puzzles and cartoons, and insightful essays The first part of this fifth volume of The Enigmatic Photon consists of three chapters which develop electrodynamics as a gauge field theory with internal  $O(3)$  symmetry using a complex basis ((1), (2), (3)). This is referred to for convenience as  $O(3)$  electrodynamics. The field equations are intrinsically non-linear and non-Abelian, and the classical potential is a physical quantity. The field equations are shown to be self-consistent and a general mathematical basis for the development is given in terms of extended Lie algebra. The third chapter develops radiatively induced fermion resonance (RFR). The opening three chapters are followed by a selection of previously unpublished scientific papers which trace the historical development of  $O(3)$  electrodynamics through the physically observable  $B(3)$  field. The editors are greatly indebted to Dr. Laura J. Evans for her painstaking preparation of Part I and Part II of this volume. This work included typesetting from original manuscripts and indexing. The production of the five volumes of this series would not have been possible without her steadfast and generous contributions. Discussions with many colleagues over internet sharpened the ideas behind this volume. Finally, the organizational support of the Alpha Foundation, founded by Milan Meszaros, proved invaluable during the later preparatory stage. This volume considers the ways in which educational research is being shaped by policy across the globe. Policy effects on research are increasingly influential, as policies in and beyond education drive the formation of a knowledge-based economy by supporting increased international competitiveness through more effective, evidence-based interventions in schooling, education and training systems. What consequences does this increased steering have for research in education? How do transnational agencies make their influence felt on educational research? How do national systems and traditions of educational research - and relations with policy - respond to these new pressures? What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas? The 2006 volume of the World Yearbook of Education explores these issues, focusing on three key themes: globalising policy and research in education steering education research in national contexts global-local politics of education research. The 2006 volume has a truly global reach, incorporating transnational policy perspectives from the OECD and the European Commission, alongside national cases from across the world in contrasting contexts that include

North and South America, Canada, France, Singapore, China, Russia and New Zealand. The range of contributions reflect how pervasive these developments are, how much is new in this situation and to what extent evidence-based policy pressures on research in education build on past relationships between education and policy. This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society. Examining the science of stream restoration, Rebecca Lave argues that the neoliberal emphasis on the privatization and commercialization of knowledge has fundamentally changed the way that science is funded, organized, and viewed in the United States. Stream restoration science and practice is in a startling state. The most widely respected expert in the field, Dave Rosgen, is a private consultant with relatively little formal scientific training. Since the mid-1990s, many academic and federal agency-based scientists have denounced Rosgen as a charlatan and a hack. Despite this, Rosgen's Natural Channel Design approach, classification system, and short-course series are not only accepted but are viewed as more legitimate than academically produced knowledge and training. Rosgen's methods are now promoted by federal agencies including the Environmental Protection Agency, the U.S. Forest Service, the U.S. Fish and Wildlife Service, and the Natural Resources Conservation Service, as well as by resource agencies in dozens of states. Drawing on the work of Pierre Bourdieu, Lave demonstrates that the primary cause of Rosgen's success is neither the method nor the man but is instead the assignment of a new legitimacy to scientific claims developed outside the academy, concurrent with academic scientists' decreasing ability to defend their turf. What is at stake in the Rosgen wars, argues Lave, is not just the ecological health of our rivers and streams but the very future of environmental science. "The authors restore metaphor to our lives by showing us that it's never gone away. We've merely been taught to talk as if it had: as though weather maps were more 'real' than the breath of autumn; as though, for that matter, Reason was really 'cool.' What we're saying whenever we say is a theme this book illumines for anyone attentive." — Hugh Kenner, Johns Hopkins University "In this bold and powerful book, Lakoff and Turner continue their use of metaphor to show how our minds get hold of the world. They have achieved nothing less than a postmodern Understanding Poetry, a new way of reading and teaching that makes poetry again important." — Norman Holland, University of Florida First published in 1990. Learn how traditional herbal practitioners are responding to the sudden, massive popularity of herbal medicine! Herbal Voices: American Herbalism Through the Words of American Herbalists examines how herbal practitioners who started in the 1960s and 1970s are reacting to the mainstream popularity of herbal medicine today. This unique book features interviews with 20 of America's most prominent herbalists—focusing on their careers, their beliefs, and their perspectives on the contemporary herbal product boom in recent years. Also included is important information on herbal organizations, publications, schools, and companies where seeds and rootstock of endangered medicinal plants can be obtained, as well as a list of the United Plant Savers' "At Risk" and "To Watch" medicinal plants. Herbal Voices synthesizes the words of a representative group of herbalists into a compelling picture of modern American herbalism as they offer their opinions on the roles of science, folklore, and spirituality in herbal medicine. This timely resource addresses controversial issues that arise within the herbal community, such as the endangered plant crisis, professionalism and licensure, and shifting the American consciousness toward a more Earth-centered way of life and health. In Herbal Voices, you'll hear from many well-known herbal practitioners, including: Rosemary Gladstar—founder of The California School of Herbal Studies and United Plant Savers, co-founder of Sage Mountain Herbs, and author of Herbal Healing for Women and of the Sage Healing Way series James Green—former Director of The California School of Herbal Studies, a member of the advisory committee for United Plant Savers, and author of both The Herbal Medicine-Makers Handbook and The Male Herbal David Hoffmann—Fellow of Britain's National Institute of Medical Herbalists, former President of the American Herbalists Guild, and author of The New Holistic Herbal, An Elder's Herbal, and Therapeutic Herbalism Richo Cech—herbalist, owner of Horizon Herbs, executive board member of United Plant Savers, and author of Growing Your Garden Pharmacy Sharol Tilgner—licensed naturopathic physician, founder and current President of Wise Woman Herbals, Inc., editor of Herbal Transitions, associate editor of Medical Herbalism, and author of Herbal Medicines From the Heart of the Earth For the first time, these leading educators, clinicians, and business owners share the joys and pitfalls of practicing an age-old healing tradition in modern America. This rich resource of reflections fills a gap in the existing literature that will be useful for herbalists, herbal enthusiasts, historians, anthropologists, popular culturists, and holistic/alternative medical practitioners.
