Healthcare Management is essential research-based reading for students, teachers and healthcare professionals involved in management, research and health policy making. “Walshe and Smith have assembled an invaluable introduction to healthcare management and health systems. With their fellow authors, they provide a comprehensive review of a range of issues related to the funding and provision of care, and how services are organised and managed. Now in its third edition, Healthcare Management has been updated and revised to meet the needs of teachers and students alike.” Professor Chris Ham, Chief Executive, The King’s Fund, UK “This book covers the main areas of knowledge which managers need, and gives tools for thinking and empirical examples relevant to current challenges. Evidence based management might not always be possible, but this book gives a way for a manager to become research-informed and therefore more effective. This third edition of the book is even more relevant internationally and improved to help readers apply the ideas to their situation.” Professor John Øvretveit, Director of Research, LIME/MMC, The Karolinska Institute, Sweden “No-one learns to be a manager in a classroom or from a book, but books that take this disclaimer as their starting point are indispensable. Walshe and Smith (and their fellow authors) invite their audience (healthcare managers, healthcare policy makers and postgraduate students, taking courses in healthcare management) to critically combine experiential learning with academic learning and to acquire knowledge from both practice and theory. By doing so, they have found the third way between the advocates of evidence-based management and their critics.” Dr. Jan-Kees Helderma, Associate Professor in Public Administration, Institute for Management Research, Radboud University, Nijmegen, the Netherlands

In today's socially networked and highly competitive world, it is imperative that marketers are always truthful because customers eventually find out if they have been misled. This can lead to their angst with the company going viral, thereby destroying the company's reputation. Marketing Management advocates 'marketing based on absolute truth'. Also brand image is sensitive to market sentiments. Brands can be in danger: one wrong product or one shoddy campaign can destroy a brand built over years. Companies must align everything that they do with the core spirit of their brands. Further, when everything seems to go digital, it is important that marketers keep in mind that customers are primarily interested in their products/services. The book advocates that superior products and services will always be central to marketing.
