Cold and Ultracold Collisions in Quantum Microscopic and Mesoscopic Systems Jul 27

2022 Cold and ultracold collisions occupy a strategic position at the intersection of several powerful themes of current research in chemical physics, in atomic, molecular and optical physics, and even in condensed matter. The nature of these collisions has important consequences for optical manipulation of inelastic and reactive processes, precision

measurement of molecular and atomic properties, matter-wave coherences and quantum-statistical condensates of dilute, weakly interacting atoms. This crucial position explains the wide interest and explosive growth of the field since its inception in 1987. The author reviews elements of the quantum theory of scattering theory, collisions taking place in the presence of one or more light fields, and collisions in the dark, below the photon recoil limit imposed by the presence of any light field. Finally, it reviews the essential properties of these mesoscopic quantum systems and describes the key importance of the scattering length to condensate stability.

Total Lemons Oct 25 2019 A hilarious look at 111 automotive atrocities. Bad design, appalling execution, ridiculous pretensions, ludicrous names - it's all here in this motoring hall of shame. Most of them didn't even seem like such a good idea at the time ... Cars that doubled as boats, cars that used salvaged aeroplane motors,

cars as long as limousines (but only good for transporting 2 people), cars that were too skinny or too wide, much too high or ridiculously heavy, cars which looked like they had been designed by Noddy with Big Ears lending a hand. there is one place they can be stars: total Lemons, a new omnibus which lovingly brings together the 111 worst cars ever built. Here you'll find the dumpy and astonishingly incompetent Austin Allegro ('A streetcar named Dire'), the frighteningly unstable Messerschmitt cabin-scooter (a 'Postwar crime') and the exploding Ford Pinto ('Passengers alight here'). You'll meet their colleagues, brothers and sisters in automobile atrocity, including certain Holdens, Falcons,

Valiants, Leylands and Lightburns. Filled with high hopes, low commonsense and photos manufacturers wish had never been taken, total Lemons is a gift book - and a warning - for the revheads in your life. As author tony Davis notes, good cars come and go, but a total lemon is forever.

Total Penguins Jul 15 2021 A comprehensive overview of a classic hockey team includes season-by-season summaries; complete stats; biographies of all Hall of Fame players, coaches, general managers and owners; details of every trade, draft pick and free-agent signing; and much more.
