Holland-Frei Manual of Cancer Medicine Jan 01 2023 Holland - Frei Manual of Cancer Medicineserves as a quick reference to current information on an extensive list of cancers, including breast, lung, thyroid, colorectal, ovarian, prostate, and gastric cancer, to name but a few. Presented as an accessible pocket-sized handbook, the chapters are organised in an outline format, offering only the most essential information on the etiology, staging (including TNM staging) and treatment for each cancer type. Individual chapters are devoted to the molecular biology of cancer, cancer prevention, cancer screening, the mechanisms of chemotherapy and diagnostic imaging in cancer. Additionally, each chapter lists all the major phase III clinical trials, and therefore, serves as an excellent reference of the major randomised controlled trials for each cancer reported to date. Specific chapters are also dedicated to the discussion of oncologic emergencies, pain and palliation and prescription complications. At the conclusion of the book, a glossary of oncologic terms and chemotherapeutic drug programs, a table of common cancer incidences and an overview of the mechanisms, common uses and related toxicities of various anti-cancer agents are featured. In addition, performance status tables, mathematical formulas and a listing of common biomedical / cancer web sites are highlighted.

Necessity, Proportionality and the Use of Force by States May 25 2022 There has been considerable debate in the international community as to the legality of the forceful actions in Kosovo in 1999, Afghanistan in 2002 and Iraq in 2003 under the United Nations Charter. There has been consensus, however, that the use of force in all these situations had to be both proportional and necessary. Against the background of these recent armed conflicts, this 2004 book offers the first comprehensive assessment of the twin requirements of proportionality and necessity as legal restraints on the forceful actions of States. It also provides a much-needed examination of the relationship between proportionality in the law on the use of force and international humanitarian law.
